Eco-water specialists

Examples of domestic tank installations

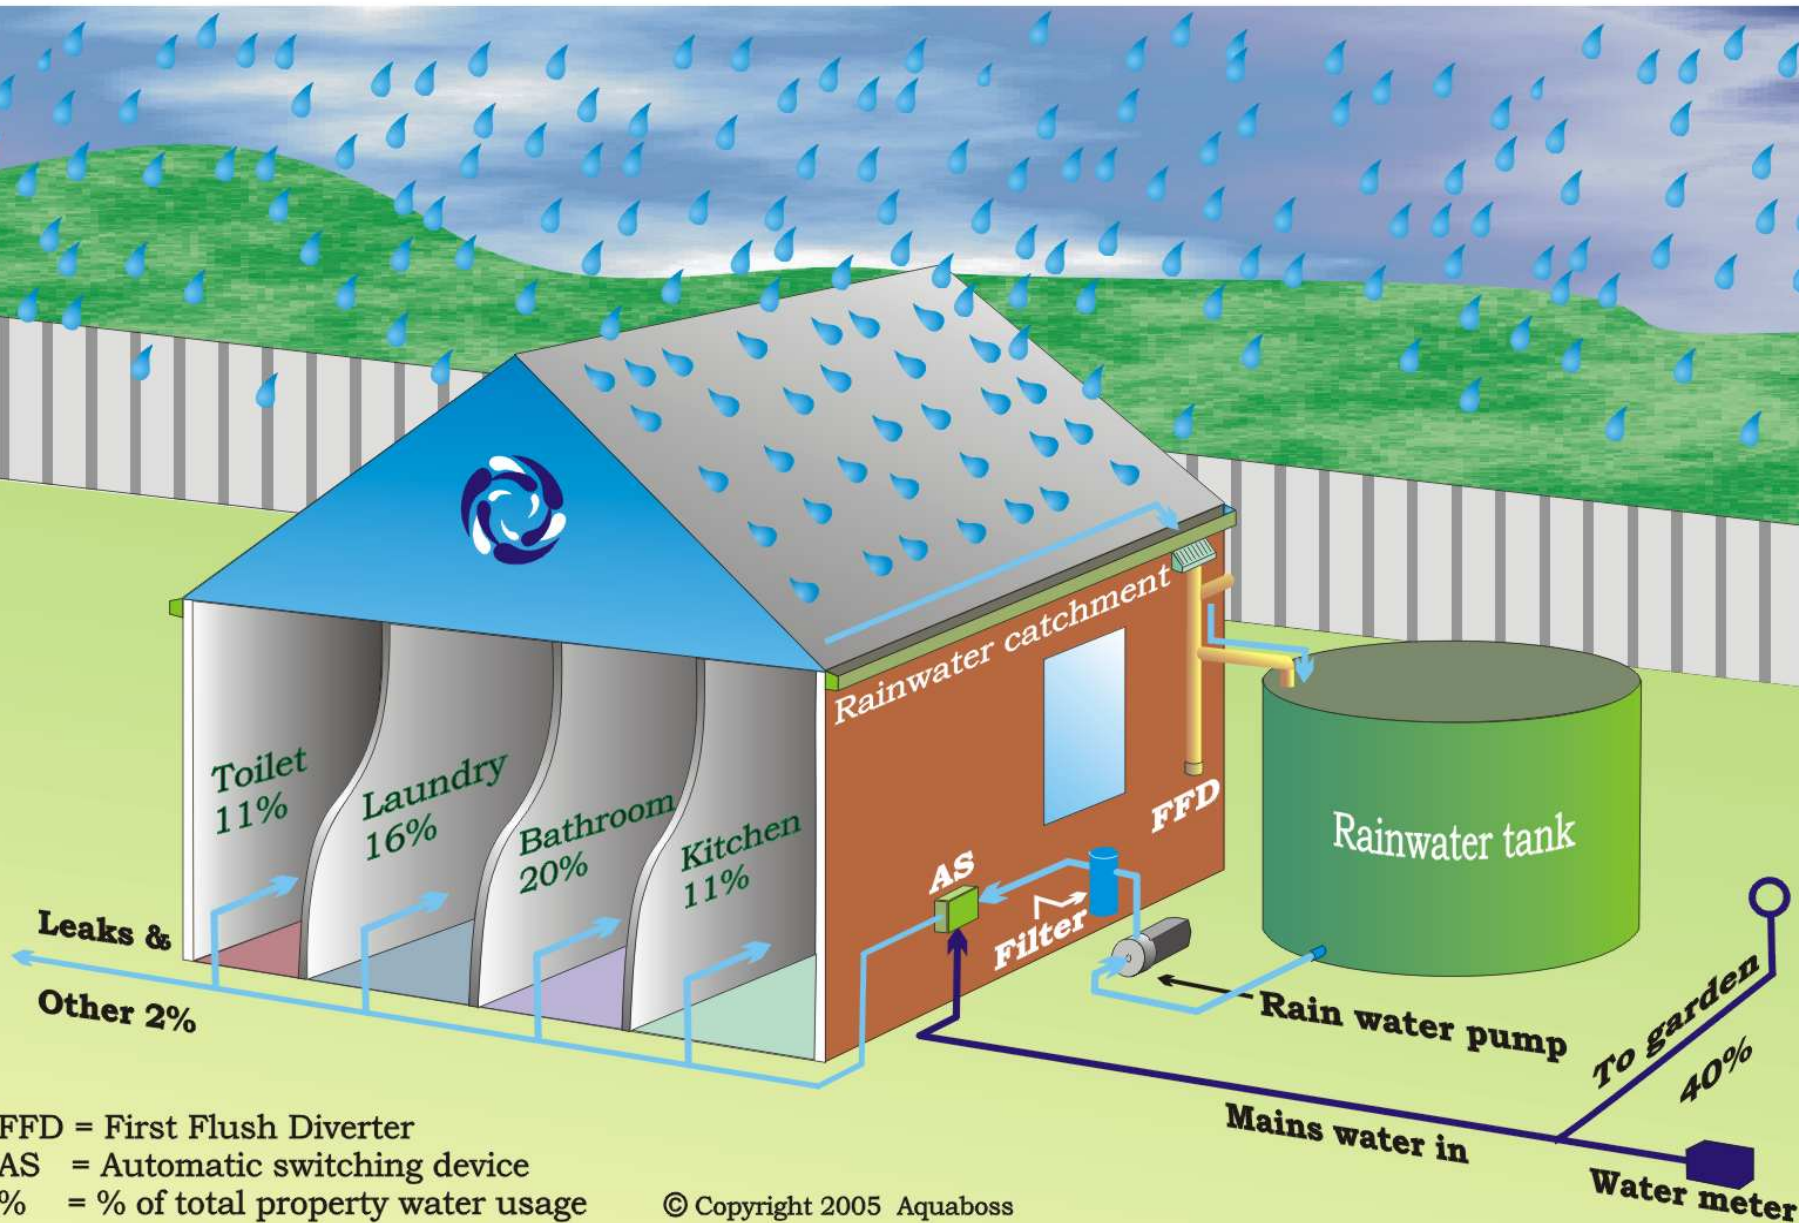

Images at left and below show the use of a satellite tank to feed rainwater into below-ground tanks which in this case are situated at the rear of the property. (In the distance in photo at left) This project falls within the high-end domestic bracket.

Images at left and below show the use of a concrete tank with load bearing top, partially below-ground. In this case the tanks is used as an entertainment area also. This project falls within the high end domestic bracket.

FFD = First Flush Diverter

AS = Automatic switching device

% = % of total property water usage
